- Troubleshoot problems in an existing network environment
- Evaluate and implement new and future technologies into current system
- Install, configure, use and manage TCP/IP on a working network
- Evaluate best practices in security concepts to maintain confidentiality, integrity and availability of computer systems

Assessment (How do students demonstrate achievement of these outcomes?)

Satisfactory scores on exams and projects.

Satisfactory scores on exams modeled after industry standard certification exams. Models are developed from the following certification exams: Microsoft MCP, Microsoft MCSA.

Labs

Validation (What methods are used to validate your assessment?)

1. Approval of Information Systems Technology Advisory Council

Course Outcomes Guide

3. Faculty Review

4. Microsoft curriculum content

**Results** (What do the data show?)
Microsoft curriculum content and certification requirements are changing

**Follow-up** (How have you used the data to improve student learning?)
Update course content

Utilizing more virtualization for learning.

**Budget Justification**
(What resources are necessary to improve student learning?)

PC lab hardware; switches, routers, projection unit, cabling, tools, printers, PCs, servers
Security hardware and software
Simulation software, Virtual PC licenses.
Testing Software.
Course Management software
Classroom Management system software
