## IntraNews

*The Summer is Here! Issue*

May - June  
2011

### Events :

#### Cash for College

Wed., June 1 - Thurs., June 30  
The Columbia Bank, Hagerstown Trust Division, has designated the HCC Foundation as the recipient for the June 2011 coin machine proceeds.

Take your loose change to any of The Columbia Bank branch offices in Washington County, use the machine to exchange coins for paper money, and the Foundation will receive the proceeds of the coin-exchange fee.

Proceeds will benefit HCC scholarships. Contact Lieba Cohen at extension 213 for details.

#### Biotech Summer Institute begins

Fri., June 10  
The Biotech Summer Institute will run from June 10 through Aug. 4

#### Testing Center Closed

Mon., July 13—Thurs., July 16  
-Closed for upgrades

#### Fort Detrick Alliance Expo

Wed., June 15  
4 to 7 p.m.  
Elliott Center  
-See page 3 for details

#### Hub Opera Ensemble performs *Così fan Tutte*

Fri., June 17 and Sat., June 18  
8 p.m. each night  
Alumni Amphitheater  
-See page 3 for details

## HCC commission reveals final recommendations

The Commission on the Future of Hagerstown Community College, which began its work in September 2010, held its final meeting to announce 17 recommendations and high-light priority areas for college officials to consider as they develop the college's Strategic Plan 2016. The 30-member commission was comprised of four study groups of community leaders, college faculty, administrators, students, staff, and alumni.

Although all of the recommendations are important for the college's future, the highest priorities identified were as follows: (1) continue collaborating with the public and private high schools and working toward the implementation of greater curricular agreements to assure college readiness; (2) maintain affordable tuition, fees, and college expenses; (3) continue efforts to seek public

and private competitive grants to support institutional priorities and strategic goals; (4) continue collaborative efforts with county and state

representatives to secure and protect the fair share of funding for HCC; and (5) maintain adequate technology investments needed for student and staff success.

"This type of community input is critical to the success of the college and the community," said Guy Altieri, HCC president. "We were extremely fortunate to have a solid group of community leaders who devoted countless hours of their time to thoroughly review and make recommendations regarding future offerings and operations of the college. As a result, our students and the community-at-large will greatly benefit from the work of this group."

The groups focused on all areas of HCC and included (1) Students and Student Affairs; (2) Programs and Educational Support; (3) Finances, Facilities, Human Resources and Technology Support; and (4)

Effectiveness and Quality Assurance. With the use of a survey tool, community leaders throughout Washington County and the surrounding area, as well as HCC graduates, provided valuable input regarding the future of HCC.

Commission findings, as well as survey results, indicate that the community feels that HCC does a very good job in meeting community and employer needs. Overall, it is recommended that HCC needs to better promote and market its credit and credit-free program offerings, its affordability, and the success of students, graduates and employees. The commission's recommendations will be used in the development of HCC's 2016 Strategic Plan, the self-study for its Middle States Association of Colleges and Schools reaccreditation, and annual institutional plans.

Carolyn Brooks, immediate past chair of the HCC Board of Trustees and current board member, and John League, editor and publisher of The Herald-Mail served as the co-chairs of the commission.

The 17 recommendations, as well as the full report of the CFHCC, are available [online](#).

# HCC students create Web site for Women in Maryland Higher Education

Photo caption: Back row, from left: HCC students Kevin Bricker and Andrew Boylan. Front row, from left: HCC students Kristina Bell, Glynis Knibb, and Lisa Andrews with Sean Maher, instructor, Web and multimedia technology.

Students in the Web and Multimedia Program at Hagerstown Community College recently completed the design for the Women in Maryland Higher Education (WIMHE) Web site.

According to HCC Web and Multimedia Technology Instructor Sean Maher, each spring, students in the Web Server Administration course (WEB 205) are charged with the task of creating, designing, and implementing a new Web site for an outside non-profit organization or local business. This

year, students worked with Jennifer Haughie, HCC director, admissions, records, and registration, to create a new Web site for the Women in Maryland Higher Education organization. Students interview the client and submit a proposal for the project, which includes goals, required technologies, content, and budget. Once the proposal has been accepted, students work closely with the client throughout the development process until the final draft of the Web site is approved and hosted to the World Wide Web.

"This was one of the most successful service-learning projects I've ever taught," says Maher. "The students

rose to every challenge, took it upon themselves to learn new technologies, and created a client-focused site that will serve as an excellent addition to their portfolios. Any Web design firm would be lucky to have such creative and talented minds working for them."

Students involved in the project included Andrew Boylan, of Cascade; Kristina Bell, of Frederick; Kevin Bricker, of Smithsburg; Lisa Andrews, of Waynesboro, Pa.; and Glynis Knibb, of Williamsport.

"I am thrilled with the Web site," says Haughie. "Not only did I personally learn a lot about putting a Web site together, I had a great time working with the students. They listened to the needs of the organization and came up with options and a fabulous plan. They were both professional and creative throughout the entire process. It was obvious to me that they received excellent training at HCC."

To view the student-designed site, visit [www.wimhe.org](http://www.wimhe.org).

## HCC takes part in Cycle United

HCC students and staff participated in "Cycle United," an eight-hour indoor spinning event sponsored by the United Way of Washington County.

Held at the Valley Mall in Hagerstown, local gyms including South Pointe Fitness Center, Studio 6, Gold's Gym, YMCA Hagerstown, Home Team Fitness, Ruff Fitness, and the Fitness Center at Hagerstown Community College donated instructors and spin bikes to the event, which was held as a fundraiser for United Way.

"The local United Way supports programs that assist people in our area who need basic support in order to become healthy and independent," says HCC English, speech, and

drama professor Michael Harsh, who serves on the United Way Board of Directors. "From the newest babies to the elderly and all in between, the United Way makes a huge difference for the betterment of our communities."

Over 300 novice and experienced indoor cyclists participated in Cycle United, including eight HCC faculty and staff members and three HCC students. The HCC spinning team included physical education instructor and fitness center coordinator Thomas Burge; student financial aid counselor Britney Carter; part-time fitness center associate Tony Clement; adjunct faculty member Beth Domenico; adjunct faculty member

Lisa Downie; associate biology and chemistry professor Bernard Murphy; administrative office associate Jackie Taylor and her husband, Brent; and associate chemistry professor Nancy Thorpe and her husband, Tim. Student team members included Ashlyn Rebok; Matthew Vich; and Rebecca Lake.

Each team member spent at least one hour cycling and adjunct faculty member Lisa Downie led the 3 p.m. ride. In addition, Harsh, of Williamsport; and HCC biotech advisor/recruiter Mylynh Nguyen, of Hagerstown, each donated funds to the event, which raised more than \$21,000 for the United Way of Washington County overall.

## Events continued:

## Hub Opera Ensemble to perform at HCC

The newly formed Hub Opera Ensemble will perform Mozart’s *Così fan tutte* in the Hagerstown Community College Alumni Amphitheater on June 17 and 18 at 8 p.m.

The Hub Opera Ensemble boasts a corps of young, rising opera singers. In its production of *Così fan tutte*, the ensemble will set the stage in America at the

beginning of the Civil War, in honor of the sesquicentennial anniversary of the war and the region’s historical ties to it.

Advance tickets are \$12 for adults and \$8 for students/seniors and are available at [www.huboperaensemble.org](http://www.huboperaensemble.org).

Tickets may also be purchased on the nights of each performance at the HCC Alumni Amphitheater box office, at which time they will be \$15 for adults and \$10 for students/seniors. HCC students and staff are admitted free. Rain date for the June 17 and 18 performances is Sun., June 19, at 7 p.m.

### About *Così fan tutte*:

*Così fan tutte* is a comic opera written by Wolfgang Amadeus Mozart that features a *libretto* by Lorenzo Da Ponte. The opera, the title of which roughly translates to “Thus do all,” tells the story of two officers who decide to test the faithfulness of their wives-to-be by attempting to seduce each other’s fiancées.

## Fort Detrick Alliance expo and networking event to be held at HCC

The Fort Detrick Alliance will host an expo and networking event in the Elliott Center at HCC on Wed., June 15, from 4 to 7 p.m. The event is free and open to the public.

Attendees will have the opportunity to learn more about the installation commands and tenant organizations at Fort Detrick in Frederick, Md.

Representatives will be on hand from the U.S. Army Medical Materiel Development Activity, U.S. Army Research Institute of Infectious Diseases, Navy Medical Logistics Command, National Institute of Allergy and Infectious Diseases Integrated Research Facility, SAIC, Mount St. Mary’s University, and HCC’s Technical Innovation Center, the

college’s business incubator with wet lab space for biotech start-ups. HCC will feature information about its STEM (science, technology, engineering, math) programs including biotechnology, cybersecurity, and alternative energy technology.

To find out more about the expo, go to [www.fortdetrickalliance.org](http://www.fortdetrickalliance.org).

## Annual Red, White and Blue Summer Concert Series begins

HCC’s Alumni Association recently announced its concert schedule for the seventh annual Red, White and Blue Summer Concert Series.

The schedule of events is as follows:

Tues., June 21 – U.S. Navy Cruisers at 6:30 p.m.

Wed., June 22 – U.S. Air Force Airmen of Note at 6:30 p.m.

Sun., June 26 – Maryland Defense Force Band at 4:30 p.m.

Tues., July 5 – 257th Army Band at 6:30 p.m.

Thurs., July 7 – 78th U.S. Army Band at 6:30 p.m.

Wed., Aug. 10 —U.S. Navy Country Current at 6:30 p.m.

Sun., Aug. 14 – U.S. Navy Sea Chanters at 4:30 p.m.

Mon., Aug. 22 – U.S. Air Force “Max Impact” at 6:30 p.m.

Wed., Aug. 24 – U.S. Navy Commodores at 6:30 p.m.

Wed., Aug. 31 – U.S. Army TRADOC “James River Ramblers” Band at 6:30 p.m.

This year’s summer concert series is sponsored by the Hagerstown-Washington County Convention and Visitors Bureau. All concerts are free, open to the public, and will be held in HCC’s Alumni Amphitheater. Concessions will be available for purchase. Please note that no outside food is permitted on the amphitheater grounds.

# HCC to work with Maryland Solar

Officials at Hagerstown Community College have reached a written understanding with Maryland Solar to incorporate the development, construction, and operation of the proposed Washington County-based 20 megawatt solar farm, into the college's alternative energy technology curriculum.

"Being involved with a project of this scope allows HCC students to be exposed to the real-world implementation of an alternative energy system at a

level beyond the typical residential and commercial application," said Tony Valente, HCC's lead instructor of alternative energy technology. "Site visits and videotaping of the installation, along with the ongoing data collection from the system's operation, will be extremely valuable to HCC's alternative energy curriculum."

"I'm excited about the leadership that HCC is showing in the areas of technology, not only for our community, but for our

state," said Del. Andrew Serafini. "In STEM programs, such as solar, biotech, and cybersecurity, Dr. Altieri and the HCC staff are leading the way and I am fully committed to working with them as they move forward with these projects."

This proposed system will require advanced instrumentation and monitoring of its daily production, which can be easily incorporated into the STEM (science, technology, engineering, math) Building that is currently under construction on the HCC campus. The 65,000 square-foot STEM Building is scheduled to open in January of 2012 and will offer the most current technology to support HCC's math and science programs, including alternative energy technology, biotechnology, and cybersecurity. Space will be designated in the STEM Building to house the monitoring and data collection equipment for the solar farm, for use by HCC faculty and

students.

"This project is significant, not only to HCC and its students, but to regional economic development as well," said HCC President Guy Altieri. "Washington County is ideally positioned to be a leader in renewable energy and this partnership illustrates the importance of HCC's alternative energy technology program."

Maryland Solar LLC, an Easton-based energy company, has proposed building the 20 MW solar farm on leased state land surrounding the Maryland Correctional Institution, just south of Hagerstown. Construction is expected to begin by the end of 2011 with the commercial operation to begin in late 2012. The project would employ approximately 125 workers in the course of the one-year build-out and would double the amount of solar power currently on the Maryland grid. It would be the largest solar facility in the state and one of the largest on the East Coast.

## PTK wins award at annual conference

**Photo Caption**—Front row, from left: HCC students Amanda England, Aletha Shaffer, and Carlee Myers. Back row, from left: HCC students Andrea Theodoru and Stefan Theodoru.

work, as well as to allow student members to attend workshops and presentations by experts in related fields. This year's convention was attended by more than 3,500 members from 535 chapters around the world. Five

PTK members represented HCC's Pi Theta chapter at the conference.

Student representatives included Aletha Shaffer, of Boonsboro; Amanda England and Carlee Myers, both of Hagerstown; and siblings Andrea and Stefan Theodoru, both of Smithsburg.

This year, HCC's Pi

Theta chapter was recognized as a Five-Star Chapter, a distinction earned through the completion of service learning projects intended to aid both the college community, as well as community members in the surrounding area.

HCC's Pi Theta chapter was also one of 25 chapters

which include leadership, service, fellowship, and scholarship. HCC's PTK officers for the 2010-2011 academic year included Shaffer; Brittany Smetzer, of Clear Spring; Oliver Bully, Jessica Cripps, Keri-Jon Faulkner, Lindsay Febres, Jennifer McCullough, Beate Powell, and Glory Sterling, all of Hagerstown; and Tessa Walls, of Hancock.

The Phi Theta Kappa Honor Society, headquartered in Jackson, Miss., is the largest honor society in American higher education with 1,270 chapters on college campuses across the United States and in other countries around the world. More than 2.5 million students have been inducted since its founding in 1918, with approximately 125,000 students inducted annually.

honored with a Distinguished Chapter Officer Team Award. This award is given to chapter officer teams that demonstrate exceptional leadership skills, emphasize teamwork, and exemplify the four hallmarks of Phi Theta Kappa,

# Earth Week encourages conservation and clean-up

## A special message from Campus Volunteers Coordinator Irene Young

The HCC campus shows the generous work of three dozen volunteers who showed up on a dreary, wet Earth Day to show their Campus Pride. The gardens are looking good, in spite of an extraordinarily wet spring. The following people signed the worksheet and deserve to be noted for their work:

Craig Wettstein  
Hollyann Wettstein  
Paige Goebelbecker  
Ashley Bockstone  
Courtney Bockstone  
Mylynh Nguyen  
Katherine Fugate  
Maria Edmonds  
Kacey Hughes  
Jamie Shurnitski  
Alisha Zeis  
Tracy Black  
Drew Black  
Sharon Bondroff  
Donals Mitchell  
Linsay Wilkinson

Dean Moser  
Gary Stallings  
John Conlon  
Patrick Conlon  
Roselyn Melgar  
Michael Riley  
Jason Boudreaux  
Dane Devin  
Elisabeth Sharpe  
Raviro Mutumbe  
Patterson McConnell  
Jake Lichtenberg  
Judy Koefet  
Mike Riley  
Ray Snow  
Mark Brown

The above list includes staff, volunteers, and students, half of whom are members of the Science Club. Several of the students experienced garden work for the first time and found that they enjoyed the good feelings that came with working in the dirt. Everyone worked from 9 a.m. until noon and some stayed to work after the Earth Day lunch and entertainment. Ed Rhone was delighted to get the gardens in shape after a rainy, wet start to spring. Volunteers worked more than 100 hours, which means that two and a half weeks of garden work was accomplished in one day!

Thank you to all those who helped!

## A special message from Science Club Advisor Mylynh Nguyen

I was very pleased with the participation in Earth Week activities! Throughout the week, there were representatives from the student body, the faculty, and the staff who volunteered and helped with our efforts to spread a message of sustainability and environmental awareness.

This year's Earth Week activities included:

- Annual Campus Recycling Drive (April 18 - April 22)
- Annual Earth Club poster display featuring posters created by students in Ellen Smith's graphic design classes (April 18 - April 22)
- Smithsonian National Zoo Field Trip (April 17)
- Go Green Expo (April 19) See page 14 for details
- "No Impact Man" film showing (April 19)
- MD-64 Cleanup (April 20)
- Campus Cleanup (April 21)
- Campus Pride Day including the Earth Day celebration (April 22)
- Hagerstown City Park Cleanup (April 22)

# Earth Day celebration brings music, song

HCC held its annual Earth Day celebration on Fri., April 22, at 12 noon. As in years past, the Earth Day Celebration coincided with the annual turning-on of the HCC fountain.

Academic Affairs Vice-President Judith Oleks presided over the ceremony. Guest speakers included Science Club members Roselyn Melgar and Patterson McConnell.

The celebration featured musical performances by adjunct faculty members Jennie Avila and Steve Wright. Avila once again sang the fountain

song she wrote for the fountain dedication in 2009, as well as a new song about Harpers Ferry founder John Brown.

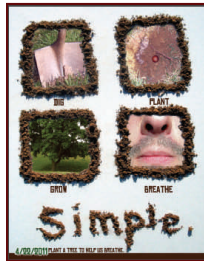

Due to rainy, cold weather, this year's event was held indoors but volunteers and guests from the Children's Learning Center still made a special trip outside to watch the fountain work its magic once more.

## Volunteers recognized for dedication

HCC volunteers were honored at the annual Volunteer Recognition Reception on Thurs., April 28, in the Career Programs Building.

During 2010, HCC's 175 volunteers worked more than 9,000 hours and saved the college an excess of \$200,000. This year, there are close to 200 volunteers working on campus in almost every department. Approximately 10 of the volunteers are active in the care and maintenance of the many gardens on campus. According to Campus Volunteers Coordinator Irene Young, head groundskeeper Ed Rhone is especially grateful for their shared energy and faithful attendance.

For more information about campus volunteering, contact Young at extension 217.

# HCC instructor makes it to third round of national novel writing contest

Amanda Skjeveland, assistant professor, English, recently participated in the annual "Amazon Breakthrough Novel Award Contest," where she advanced to the third round of finalists.

Held each year by Amazon.com, the contest accepts 10,000 fiction entries: 5,000 in general fiction and 5,000 in young adult fiction. Writers

were asked to submit novels between 50,000 and 150,000 words that were previously unpublished or self-published. Judges narrowed down the entrants over a six-month period and two grand prize winners were announced at the contest's conclusion.

Skjeveland made it to the third round of the general fiction competition and was one of 500 entrants to make it to that level. As a quarter-finalist, her full manuscript was reviewed by Publishers Weekly. In addition, Amazon customers were able to download, rate, and review her novel on Amazon.com, which allowed readers to provide feedback for Penguin editors as they reviewed contest submissions.

"I was really nervous as I waited to find out whether

I'd made it to the third round," says Skjeveland. "Although I always tell my creative writing students to write for themselves, waiting to get that first feedback from readers is both exhilarating and terrifying."

Skjeveland, who says she's been writing since she could first hold a pencil, has previously published poetry and short fiction in literary magazines, but has never attempted to publish a novel. She wrote her 70,000-word novel, "Memorabilia," during the summer of 2010. She says that she undertook the project as part of her own personal "novel-writing month."

According to Skjeveland, NaNoWriMo (National Novel Writing Month) is held every November. Writers who participate in this project

have the ultimate goal of completing a 50,000-word novel in one month but, for academics, trying to write an entire novel during the month of November is often a challenge. To circumvent this issue, Skjeveland held her own NaNoWriMo in June and wrote "Memorabilia" over a five-week period.

"The enthusiastic support from my family, friends, and co-workers has been amazing," says Skjeveland. "Writing is such a solitary task; it's an incredible feeling to sit alone for so many hours creating a new world, and then to realize that readers are actually excited to spend time in that world."

## Conservation film by HCC adjunct instructor debuts June 14

"One With Life," the conservation film co-produced by Audra Haddock Martenot,

adjunct faculty member at HCC, and Rob Owens, president and owner of Eagle Rock Productions, will debut on Tues., June 14, at the National Conservation Training Center (NCTC) in Shepherdstown, W.Va.

Filed by Eagle Rock Productions, "One With Life" provides an intimate look at a growing, worldwide movement that emphasizes the need for people to connect with nature, with a special emphasis on the importance of engaging and encouraging children to explore the great

outdoors.

"Today, the health of children is a great issue and the idea is to encourage them to get back to nature, to get away from the television and go play outside," says Martenot. "In their hearts, everybody knows that humans and nature are connected but people get busy and they forget. This film is another step to try to make people aware of the importance of nature: We can't exist without it and it can't exist without us. It's a way to try to bridge the gaps

between nature and ourselves."

The first public screening of the film will be held at 6:30 p.m. in the Byrd Auditorium at the NCTC, which is located at 698 Conservation Way in Shepherdstown. The public is invited to attend.

This film was produced in cooperation with the Friends of the NCTC, Marj Frye, and The Nora Roberts Foundation. To learn more about Eagle Rock Productions, go to [www.eaglerockproductions.com](http://www.eaglerockproductions.com).

### Maintenance and Custodial Requests

**New Work Order System:** The Facilities Management and Planning Department has implemented a new maintenance and custodial work order system provided through SchoolDude.com. This new system enables the requester to monitor the progress of the work order and allows the facilities staff to process the work order more efficiently.

To use the new system, staff members must set-up a work order requester account by going to [www.hagerstowncc.edu/myschoolbuilding](http://www.hagerstowncc.edu/myschoolbuilding) and following the directions provided on the Web page. **Please note that you must be logged-in to the Web site to view this page.** After setting up the account, a work order may be submitted. Employees are asked to continue to call extension 339 for all urgent requests such as water leaks, plumbing emergencies, electrical outages, and room lockouts.

# HCC names outstanding adjunct faculty

HCC recently recognized seven of its outstanding adjunct faculty members for the 2010-2011 academic year.

Each academic division nominated one adjunct faculty member to receive an award. Recipients included Sarah Brown, a biology instructor who has taught in the Mathematics and Science Division for six years; Carl Creedon, a paralegal studies, administration of justice, and sociology instructor who has taught in the Behavioral and Social Sciences/ Business Division for 14 years; Robert Koziel, an information systems technology instructor who has taught in the Technology and Computer Studies Division for 12 years; Kelly

Lesher, a critical care nurse who has taught in the Nursing Division for two and a half years; Robin Shaner, a costume design instructor and costume construction assistant who has taught in the English and Humanities Division for 18 years; Krista Smith, a developmental education instructor who has taught in the Developmental Education and Adult Literacy Services Division for eight years; and Robert Steiner, a dental instructor who has taught courses in the Health Sciences Division and the Continuing Education and Community Services Division for five years.

In addition, Shaner was also recognized as Outstanding Adjunct Faculty of the Year in 2010. In the last 18 years, Shaner has costumed more than 56 productions for the college.

# Seven honored at retirement reception

**Richard Gagliardi**, assistant professor, accounting, who is retiring in June after six years of service.

**Sandy Krieger**, executive assistant to the vice-president of academic affairs, who retired in 2010 after 33 years of service.

**Wilma Lopez**, testing center assistant, who retired in 2010 after five years of service.

**Judy Oleks**, vice-president, academic affairs, who is retiring in June after five years of service.

**Wayne Siler**, night-time custodial supervisor, who retired in 2010 after 11 years of service.

Retirees were honored at a special reception in the Elliott Center on May 16. Dr. Guy Altieri served as master of ceremonies and Jennifer Haugie, director, admissions, records, and registration; Jerry Haines, director, instruction; Robert Spong, director, facilities management and planning; and Judy Oleks, vice-president, academic affairs, offered remarks on the retirees.

Photo Caption: Recent retirees, from left: Wilma Lopez, Marie Salgado, Dan Bock, Sandy Krieger, and Judy Oleks. Not pictured: Rich Gagliardi and Wayne Siler.

HCC recently honored seven retiring faculty and staff members who collectively gave more than 130 years of service to the College.

Recent retirees included: **Daniel Bock**, assistant director, admissions, records and registration, who is retiring in June after 40 years of service.

**Marie Salgado**, testing center specialist, who retired in 2010 after 30 years of service

# HCC bids farewell to Academic Affairs Vice-President Judy Oleks

Well-loved by the faculty and her fellow executive officers, Oleks is known for her good humor, sharp wit, and

After six years at HCC, Dr. Judith Oleks, vice-president of academic affairs, will retire in summer 2011.

Oleks has an Ed.D. in higher education administration from University of Massachusetts/Boston, a M.S. in mathematics from University of Lowell, and a B.A. in mathematics from Salem State College.

Prior to her years at HCC, Oleks served as Dean of Professional Studies; Director of Management Information Systems, Acting Dean of Math, Science, and Technology; and Department Chair and Professor at Bunker Hill Community College in Charlestown, Mass. She also taught mathematics at Peabody Veterans Memorial High School in Peabody, Mass. from 1968 to 1985.

caring attitude about faculty and staff alike.

"Judy has done a fine job here at HCC," says Tom Clemens, professor, history and political science. "She is a great faculty advocate, and is also fair and honest. She never hesitated to tell us the truth, even if it wasn't what we wanted to hear. Although her tenure here has been relatively short, her impact and effectiveness will be felt long after she is gone."

"Dr. Oleks has been a supportive force to the academic officers during her tenure," says Robert "Bo" Myers, director, athletics and leisure studies. "She has been focused on guiding our efforts to become better administrators."

"Judy has certainly been a

friend and cheerleader of the faculty," says Melinda May, associate professor, English and humanities. "She has provided consistent direction and encouragement as we maneuvered our way through these trying and exciting times. She has deeply touched each one of us and will be greatly missed."

"Dr. Oleks supports her faculty and administration," says Theresa Marks, instructor, dental assisting/hygiene. "She strives to listen, explore

forthright when the situation is warranted. Judy has an ability to put people at ease, she relates well with others, and willing to share personal stories and experiences to demonstrate a point. She makes it easy to discuss with her even the most challenging subjects."

"I always enjoyed Dr. Oleks friendly attitude toward everyone," says Marlys Palmer, professor, health and physical education. "I found her outlook on life to be refreshing!"

"Dr. Judy Oleks brought structure, form, and function to the academic ranks at HCC," says Margaret Spivey, director, technology and computer studies. "Her unique style of management also included sensitivity towards faculty and staff through which she has earned my respect. My best wishes for her next adventure in this game we call life."

and implement our ideas. She is a great mentor and supervisor."

"As a newer member of the academic officers, Dr. Oleks has provided me with straightforward guidance and direction," says Angie Stoops, director, health sciences. "She has a very gentle, compassionate demeanor but can be very

HCC honored Oleks along with six other retirees at a special reception on May 16. HCC faculty also held a private reception for Oleks on May 5. Bomber (below), the official mascot for English and Humanities, also joined the faculty celebration in the hopes that he, too, would be able to enjoy some cake.

## Well-Wishes for Dr. Oleks

"Judy, thanks for your support and guidance. It has been a wonderful opportunity to work with you for over three years. I wish you well as you continue the next phase of your journey. Wishing you the best of life- happiness, health, and an opportunity to participate in whatever brings you joy."

—Angie Stoops

"Thank you for your hard work and mentorship, Dr. Oleks. You will be missed." — Theresa Marks

"Best wishes, Judy!" — Melinda May

# After 40 years, Bock says goodbye to the ARR department at HCC

After 40 years of working in Admissions, Records, and Registration, Assistant Director Daniel Bock will retire on June 30, 2011.

Bock has an Ed.D. in junior

Slippery Rock University.

Bock began working at HCC in 1971 as a counselor and was promoted to his current position of assistant director in 1998 where he has remained ever since.

According to his fellow staff in the ARR Department, Bock is well-known for his love of the sports, dogs, and the Andy Griffith Show, as well as his caring attitude towards students and his knowledge of higher education.

"Dan has been such a valuable member of the HCC family and ARR for the past 40 years," says Jennifer Haugie, director, admissions, records and registration. "He has a wealth of institutional knowledge that will be lost when he

operations coordinator, extension services. "He always makes a point to find common ground with everyone and he makes staff and student workers feel very comfortable in the office. We all enjoy stopping by to talk to Dan about sports, pets, and Andy Griffith! Dan is a supportive leader and wants the best for

each of us in our careers. He also has more four-legged visitors than anyone else on campus--perhaps due to the box of Milk Bones that occupies a prominent place on his shelf!"

"Dan often compared

himself to Scooby-Doo," says Sherry Donovan, recruitment specialist/advisor, industrial technology and alternative energy technology. "A Great

Dane who always saved the day by slaying the monsters and

solving the mystery."

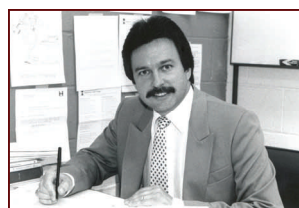

"Will I miss Dan Bock? You'd better believe it," says Kevin Crawford, recruitment coordinator. "Dan has been a tremendous friend to me. Not a day goes by that we don't share a laugh about sports (usually the sad state of the Orioles or the Pirates) or The Andy Griffith Show. I am honored to be the only person in the 'Pink Floyd' fan club with Dan and will proudly wear my Floyd Lawson t-shirt with pride. I am saddened to be losing Dan from HCC but am happy that our friendship will continue."

and community college education from Virginia Polytechnic Institute and State University; a certificate in advanced graduate students in education from Virginia Polytechnic Institute and State University; a M.A. in guidance with a special emphasis on student personnel administration from Indiana University of Pennsylvania; and a B.A. in psychology from

retires on June 30. Dan has witnessed many trends in higher education that have come and gone and then come back again! He has been instrumental in helping ARR through many transitions and changes. He will be greatly missed by everyone in ARR."

"Dan is really welcoming to new staff members," says Emily Hollins, recruitment/

## Hassinger publishes article in Torch Magazine

An article by Jim Hassinger, retired HCC engineering technology professor and husband to Brenda Hassinger, radiography professor and medical imaging coordinator, was published in the spring 2011 edition of Torch Magazine.

The article, "The Root Causes of the Great Depression," describes the underlying conditions and policies that led to the stock market crash of 1929.

Named Professor Emeritus in 2007, Hassinger still teaches a lifelong learning class at

HCC in the Continuing Education and Community Services Division that covers the same subject matter.

Hassinger retired in 2005 after 32 years of teaching and then returned as a volunteer and physics tutor in the radiography program. According to Hassinger, since his retirement, he's written three novels and has enjoyed his membership in the Pegasus RC club. He also says that, "Duke the Doberman and I eagerly anticipate Brenda's retirement and look forward to many more good years to come."

## Cavey and Powell join MMTA Road Team

John Cavey, coordinator, commercial vehicle transportation, and instructor Bob Powell have been invited to become part of the Maryland Motor Truck Association's (MMTA) Road Team.

jobs to reinforce and promote the importance of safety and professionalism in the trucking industry.

Founded in 1935, MMTA is a non-profit, member-driven

sociation's (MMTA) Road Team.

The MMTA Road Team is a group of elite, highly-skilled, safety-conscious Maryland truck drivers who take time away from their

trade organization that is one of the largest trucking associations in the country, representing 1,000 member companies. To find out more about MMTA, go to [www.mmtanet.com](http://www.mmtanet.com).

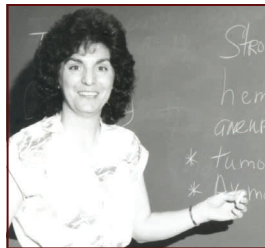

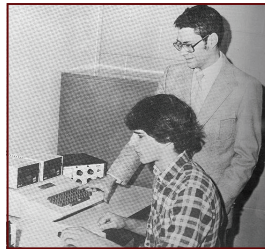

## Did you know...?

Brenda and Jim Hassinger met on the HCC campus. Read Jim's take on how they met below:

"About 20 years ago, I went to Liz Miser, HCC guidance counselor, and she arranged a formal introduction with Brenda McGolerick, the radiography program coordinator

whom I'd admired from afar. After a proper courtship chaperoned by Brenda's two nieces and with the approval of her co-faculty member, Judy Kofoet, we were married on June 5, 1993."

## Maintenance and Custodial Guidelines continued...

**Major Construction:** Construction projects on campus have increased the amount of dust, dirt and gravel on the walkways, which consequently is carried into the buildings. It is recommended that staff make full-use of the walk-off mats at the entrance of the buildings to help keep the bulk of the debris outside the campus buildings.

**Recycling:** HCC recycles! Two types of collection bins are available: one for paper and one for comingled glass, plastic, and metal. Two sizes are available and include small bins for offices or classrooms and large bins, which are located in central common areas. Staff are asked to break-down boxes that will not fit in the bins and place them next to or behind the large bins located in central common areas. It is the responsibility of office occupants and classroom users to empty the smaller containers into the larger ones for custodial staff to collect.

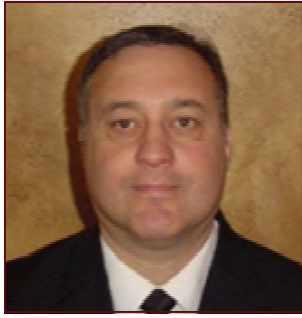

**Carpets:** Carpets are cleaned regularly on campus. Staff are asked to avoid spills on carpet as much as possible. Please ensure that trash and garbage items are placed into the trash cans and not on the floor around them. When the inevitable spills do occur, please submit a work order request.

**Offices:** Each night, custodial staff empty trash, straighten furniture, and vacuum traffic patterns. On a scheduled basis and/or as needed, custodial staff also dust, wipe down surfaces, vacuum entire carpeted surfaces, and dry and wet-mop hard surfaces. If there are items on the floor, on shelves, or on table or desk surfaces, staff will do their best to clean around them. Generally, items other than chairs are not moved.

**Classrooms/labs:** Floors are vacuumed, dry-mopped and wet-mopped as needed. Trash is emptied and boards are cleaned on a daily basis. If anything written on the boards needs to be saved, please leave a bold, obvious note asking for it to be saved. In chemistry and biology labs, staff clean counters and sinks unless there are specimens or equipment laid out on these areas. Floors are dust-mopped and wet-mopped as needed. **For the safety of the custodial crew and the environment, please dispose of all bio or chemical hazardous waste in the appropriate manner.** If there is need for a special trash pick-up due to size or some other reason, please submit a work order request.

# HCC search for VP candidate down to four finalists

Marvin Blachman

Pamela Monaco

Billie Unger

David Warner

As Hagerstown Community College's current vice president of Academic Affairs, Judith Oleks, prepares to retire this summer, college officials have been working to name her replacement. From an initial pool of 88 applicants, a committee has chosen four finalists, from a national search, to participate in on-campus interviews later this month.

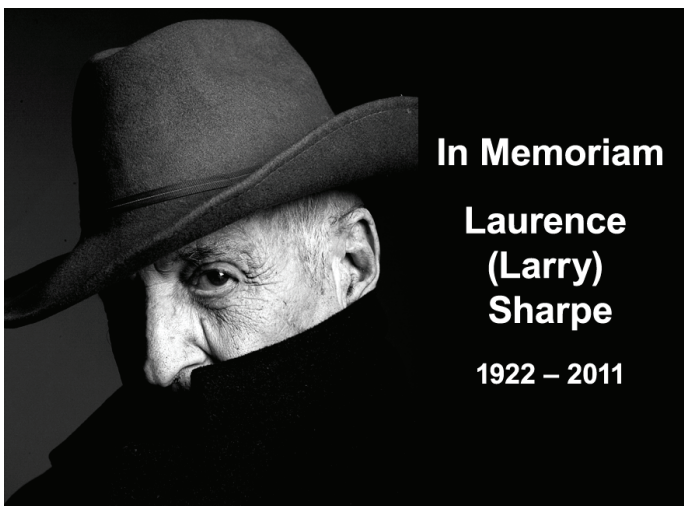

"We were fortunate to have a large and well-qualified group of applicants for this critical position," said Guy Altieri, president. "The four who made the cut stood out from the others because their experiences best align with the vision we have set for HCC to continue its strong program and related enrollment growth well into the future."

The four finalists include Marvin Blachman, Ph.D., of Pulaski, N.Y., dean for liberal arts at Jefferson Community College in Watertown, N.Y.; Pamela Monaco, Ph.D., of Trabuco Canyon, Ca., dean of arts and sciences at Brandman University in Irvine, Ca.; Billie Unger, Ed.D., of Martinsburg, W.V., dean, School of Liberal Arts and Transitional Studies

at Blue Ridge Community and Technical College in Martinsburg; and David Warner, III, Ed.D., of Hagerstown, executive director of the University System of Maryland at Hagerstown.

The college expects to announce the appointment of the new vice president in July.

## HCC professor Larry Sharpe honored in Times Square

### In Memoriam

Laurence  
(Larry)  
Sharpe

1922 – 2011

Database/System Administrator Chris Davis found a special way to pay homage to the late Larry Sharpe when he convinced Kodak to display his photo of Sharpe on the Kodak board in Times Square as the "Picture of the Day." According to representatives at Kodak, the "Picture of the Day" images have not been displayed in Times Square since 2009. Davis' persistence paid off when Kodak made a special exception to display his photo of Sharpe on Fri., May 6.

"It was the only tribute I thought I could give him," says Davis. Davis created the 180-degree view above by stitching together 15 images that he took while he and his family were in New York.

To read the Herald-Mail article about Davis' tribute, click [here](#). To learn more about Professor Sharpe, click [here](#).

# News in Brief

## HCC wins Impact Award

HCC won the Impact Award at the 12th Annual Washington County Business Awards on Feb. 23.

According to the Chamber of Commerce, the Impact Award is given to the Washington County business that has demonstrated product or service quality, innovation, strong community involvement, high standards in business practice, commitment to Washington County and the community, and who has established a successful business in Washington County.

In 2007, HCC won the At Your Service Award, which is awarded to a Washington County retail or service business that has generated customer loyalty and satisfaction.

## Students advance to CCDC regional finals

Students in HCC's networking technology program recently advanced to the regional finals of the sixth CyberWatch Mid-Atlantic Collegiate Cyber Defense Competition (CCDC), held at the Johns Hopkins University Applied Physics Lab.

HCC is one of eight schools that was narrowed from an initial field of 23 colleges and universities within the Mid-Atlantic region. In the competition, HCC students had to use their skills to defend their network against a cyber attack from another school that was charged with conducting offensive operations.

## Annual CREAS event teaches trauma scenarios

The annual CREAS (Criminal Response Emergency Assessment Scenario) event was held on Sat., April 16 in the Career Programs Building. Graduating students in the registered nursing, practical nursing, paramedic emergency services, medical imaging, medical assisting, and phlebotomy programs worked together to treat a variety of trauma scenarios based on fictional events.

Learn more about this event by going to the [HCC Web site](#). To view photos from this event, go to the official [HCC Facebook page](#) or click [here](#). You do not have to be logged-in to Facebook to view these photos.

# News in Brief

## First “Go Green Expo” held at HCC

The first Western Maryland “Go Green Expo” was held on April 19, in the ARCC.

Sponsored by Congressman Roscoe Bartlett’s office in conjunction with the Hagerstown Washington County Economic Development Commission and HCC, the event featured training sessions with industry experts and local vendors specializing in new technology for home energy solutions.

Over 200 people attended the event. Learn more about the expo by reading the article in the [Herald-Mail](#).

## Student Success Center holds Shakespeare event

In honor of the infamous bard’s birthday, staff in the Student Success Center held a Shakespeare-inspired event on April 22.

Hosted by Marti Grahl, instructional assistant, developmental writing/reading/ESL and Catherine “Liz” Hadley, ESL and developmental composition, the event included films inspired by Shakespeare’s many plays, cake, and costumes.

Pictured in the photo on the left are Hadley (left), HCC student Josh Wallech, and Grahl.

## HCC hosts second Cybersecurity Expo

Congressman Roscoe Bartlett, in conjunction with the Washington County Chamber of Commerce, held the 2nd Cyber Safety Meeting and Expo on April 27 in the ARCC.

The event focused on social networking, cloud computing, hacking mitigation, and threats to business and personal data. Government security researchers were also on-hand to provide live demos on computer vulnerabilities and problem resolution.

Learn more about the expo by reading the article in the [Herald-Mail](#).

# Math Mania strikes again

## “Pi” in the Eye Toss

The HCC Math Club celebrated Math Awareness Week by hosting a variety of events for students. The much-loved “Pi in the Eye Toss” returned this year to claim a few more victims, including Rebecca Kendrick, instructional assistant, college algebra and Math Club advisor; Tom Crawford, associate professor, mathematics and business; and Rich Campbell, assistant professor, developmental mathematics, as well as a variety of willing Math Club students.

# HCC Night at the Suns

The College held a special HCC Night at the Suns stadium on Fri., June 3, which was well-attended by staff and faculty.

Dr. Altieri throws out the first pitch on HCC Night.

Enrollment Assistant Shelley Lesher and her son at the game.

Buyer/Inventory Control Associate Ellen Crofford (left) and Nursing Administrative Office Associate Jan McLaughlin enjoy the game with their spouses.

HCC Board Member Austin Abraham smiles at the camera.

## The Kings of Cool

SGA Senator Long Vo (left), SGA Vice-President Tim Barger (middle), and Multicultural Recruiter Luis "Jairo" Flores recruit Suns fans as they make their way into the stadium.

Business and Procurement Director Lita Orner watches the game with her family.
