Course/Program Title: NUR 113: Practical Nursing Through the Lifespan I

Course/Program Team: Patricia Williams, MSN, RN and Susan Wells, MSN, RN

Expected Learning Outcomes:

- Incorporate the nursing process into the plan of care for women and children
- Demonstrate measures of safety when providing care to all age groups
- Integrate ethical and legal principles into the care of children and childbearing families
- Demonstrate sensitivity to the individual and family
- Adapt communication skills for the developmental level of the individual
- Interact as a member of the healthcare team in providing care for children and childbearing families
- Demonstrate efficient and cost effective use of resources when providing care to individuals and families
- Examine personal and career growth in relation to established educational goals
- Verbalize the importance of continuity of care for the individual and family

Assessment: Clinical/Simulation observations and evaluations, projects, written assignments, examinations, student evaluations

Validation: Observation and demonstrations in the clinical lab/simulation setting and in the clinical setting as well as theory examinations. The ATI Maternal Newborn and ATI Care of Children Content Mastery Exam are administered in the NUR 113 Semester at the conclusion of the specific course content and after additional information and nursing skills are taught in the clinical lab and classroom.

Results: Seventeen (17) students started the NUR 113 course and thirteen (13) successfully completed the NUR 113 Session. Four students were unsuccessful in completing the NUR 113 course. One of the students was a transfer from the RN program and 3 were returning students from the Class 2013-2014 that were unsuccessful in the NUR 112 course. These 3 students will be unable to return to the PN program as this is their second failure in the PN program. These students that were unsuccessful were offered multiple times to seek assistance from the faculty and never responded to the offer. All of the four were successful in the clinical arena.

Follow-up: Will review the student clinical evaluations and the ATI Maternal Newborn and Care of Children Content Mastery Examination to determine any changes in teachings and laboratory practices that need to be addressed.

Student evaluations will be reviewed as to their perspective on the clinical site and the use of simulation in the laboratory.

ATI Content Mastery Exam for Maternal Newborn:

- Level 3: 8 students
HCC Practical Nursing Program 2014-2015
NUR 113 Course Outcomes and Summary
Fall 2014

- Level 2: 1 students
- Level 1: 8 students
- Below Level 1: 0 students

ATI Content Mastery Exam for Care of Children

- Level 3: 1 student
- Level 2: 12 students
- Level 1: 3 students
- Below Level 1: 1 student

In reviewing the ATI results, faculty will discussed and reviewed updated course content with the and changed the textbook as well as review the NCLEX-PN final report to determine changes in teaching content. In addition, faculty will need to reconsidered clinical hours in the future as this year, the facility offered wonderful learning opportunities for the students. (Faculty understand that the time schedule for the OB/Peds rotation can be very sporadic in admissions and learning for the students.) Students indicate that they have the ability learn more in the simulation than what is offered in the clinical setting, due to the timing of admissions, etc.

**Budget Justification:**

- Need additional assistance in the clinical laboratory/simulation to allow more face to face time to demonstrate nursing skills and monitor return demonstrations
- Continue with the ATI Program and the Skills Module assignments as well as the practice modules available online to the students.
- Continue to pursue reputable clinical site/s for OB and Pediatric clinical experiences
- Possibly consider additional simulation laboratory experiences for both OB and Ped learning
- Need student assistance to offer tutoring to improve student success in the nursing program

Please post with December Nursing Faculty minutes.

Patricia C. Williams, MSN, RN
Coordinator of the Practical Nursing Program
