

Plant Parts!

Let's get a close up look at some plants and their parts.

A. Can you name three parts of a plant?

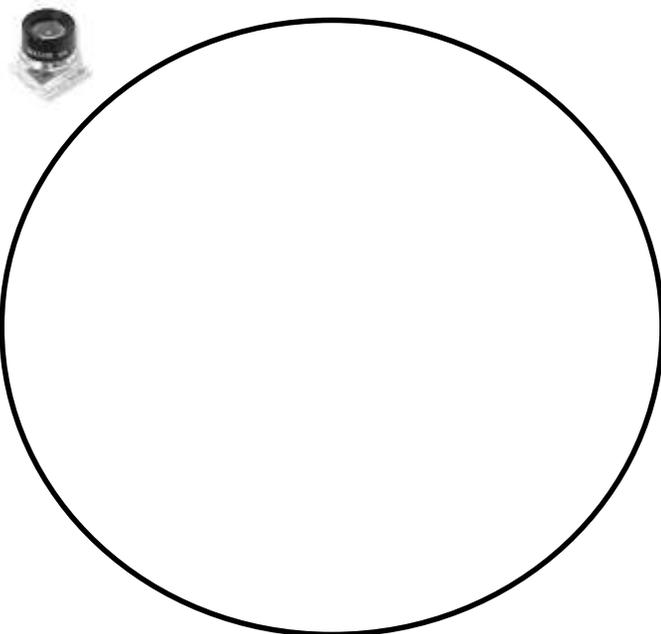

Ask a friend for help, if you need it.

1. Now, **draw** a plant and **label** these **three parts**:

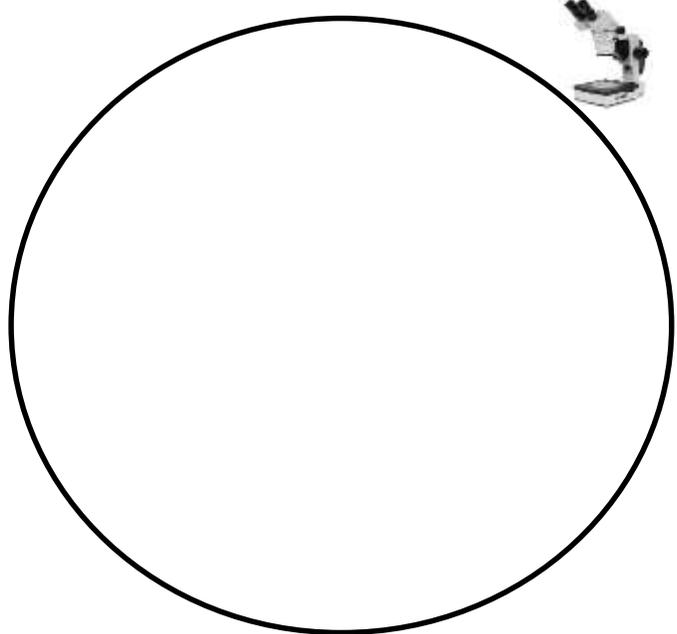

B. Look at a seed with the hand lens and microscope.

Part 1: The seed. Draw and label what you see:

What I see with the hand lens:

What I see with the microscope:

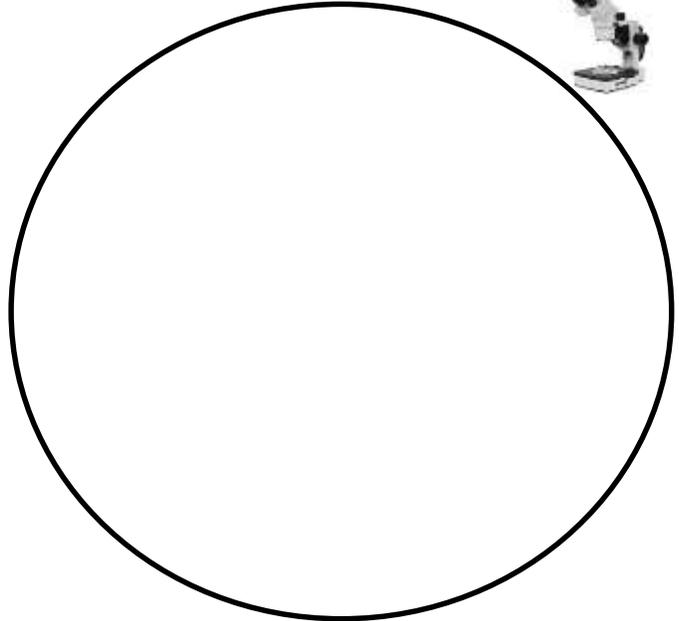

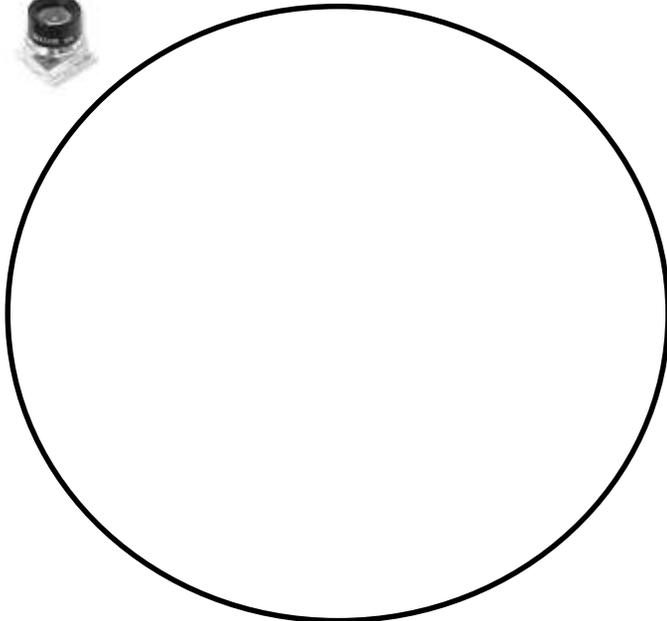

C. Now pick another plant part. Which one did you pick?

Part 2: _____ . **Draw** and label what you see:

What I see with the hand lens:

What I see with the microscope:

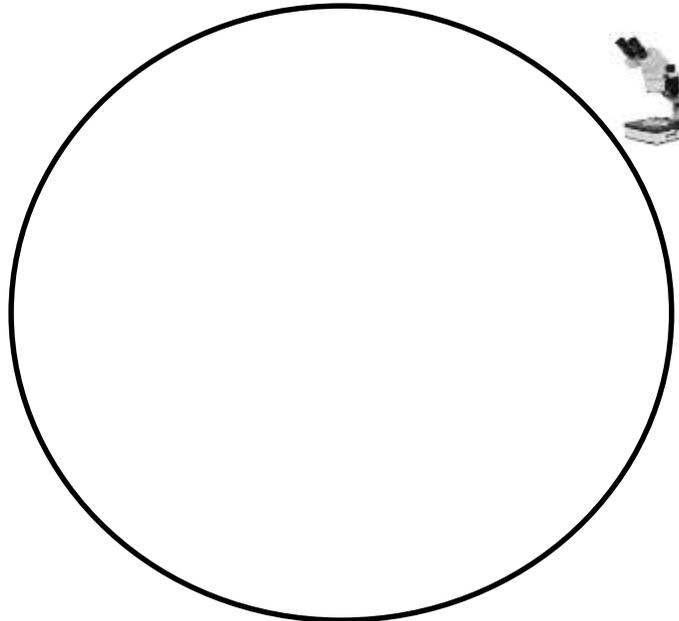

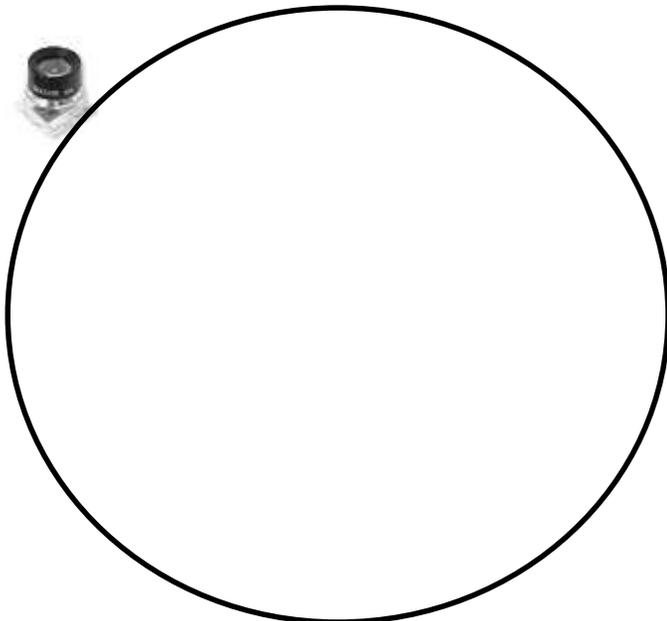

D. Now pick another plant part. Which one did you pick?

Part 3: _____ . **Draw** and label what you see:

What I see with the hand lens:

What I see with the microscope:

E. What did you learn about the parts of a plant?

1. Describe two things that make the seed different from Part 2 and Part 3.

2. Describe two things that make Part 2 different from Part 3.

3. What other differences did you see?

4. Why are the parts different?
