

Course Title: TRK 210, Transportation Management

Course Instructor(s): Michael Stevenson

Programs: Commercial Vehicle Transportation

Expected Learning Outcomes

- **Students will understand the importance of domestic and international transportation systems to the supply chain**
- **Acquire basic knowledge of warehouse, order processing, and inventory control**
- **Define the benefits and process or system improvement gained from a hands on warehouse project**
- **Understand the importance of decisions within the supply chain**

Assessment (How do students demonstrate achievement of these outcomes?)

- **Hands on warehouse project**
- **Exam on course material**
- **Discussion board interaction**

Validation (What methods are used to validate your assessment?)

- **Feedback surveys**
- **Participation interaction evaluations**
- **This course is approved by the CVT Advisory Committee**

Results (What do the data show?)

- **Students gain full grasp of terminal learning objectives**

Follow-up, (How have you used the data to improve student learning?)

- **Providing project based research opportunities tailored to each student and their personal background and experience.**
- **Lead an active warehouse tour and allow students to select their own continuous improvement recommendations.**

Budget Justification

Course Outcomes Guide #4

(What resources are necessary to improve student learning?)

- **Some means of providing a lecture based recording on the course page.**

On Line teaching program (blackboard, moodle)
