

Wildlife CSI

A crime has been committed in the forest!! The criminal left some evidence at the scene. Examine the hairs collected from local wildlife and the crime scene to figure out who did it.

Draw the general structure of each sample in the rectangle next to its name and describe the color, thickness and any patterns you see to help you determine what type of animal hairs were collected at the crime scene.

1. Bobcat

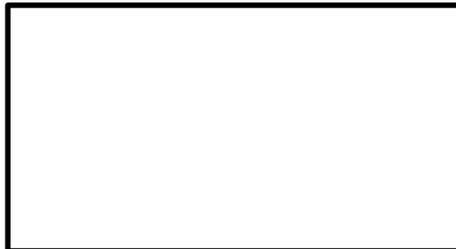

2. Coyote

3. River Otter

4. White-tailed deer

5. Dog

6. Human

7. Cow

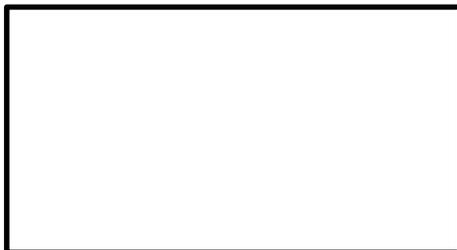

8. Chicken

9. Sheep

10. Evidence from crime scene

Circle the animal(s) that you think left their hairs at the scene of the crime.
