Course Outcomes Guide  
Spring 2015

Course/Program Title: MAP 211 Coding Simulation & Certification

Date: 5/14/2015  SU14, FA14, and SP15 semesters

Course/Program Team: Melanie Rowland, Melinda McIntire

Expected Learning Outcomes:

1. Demonstrate coding competency by achieving a minimum score of 70% for each required coding competency in preparation for successful completion of AAPC/AHIMA coding certifications.
2. Apply concepts of medical necessity, correct coding initiative guidelines, local coverage determinations and documentation requirements to develop accurate and appropriate coding in both hospital and non-hospital settings.
3. Apply knowledge of CMS reimbursement methodologies and documentation regulations to develop accurate and appropriate coding for various clinical situations.

Assessment

Course completion: Number passing at 75% or greater.

Course Outcomes:

CO 1 Number passing Mock CPC exam with a score of 70% or greater

CO 2 & 3 Common final exam for item analysis:

CO 2 Largest section of CPT
CO 2 Modifier 25
CO 2 Anesthesia service time
CO 3 Multiple surgical rule
CO 3 Sedation Coding
CO 3 Poison coding

Validation

Course Completion:

Completion of course with an average grade of 75% or greater.
Course Outcomes:

Course Outcome 1 – 75% of students will achieve a grade of 70% or higher on the mock CPC exam (70% is required by the AAPC to pass the real CPC credentialing exam.)

Course outcome target final exam questions will be answered correctly by 75% of the students.

Results

Course Completion:

100% (20/20 students) completed course with a grade of 75% or higher

Course Outcomes:

Follow-up

There was a slight improvement in the number of students passing the mock SPs exam due to the change in scheduling of the sections and more time spent working with the students to improve their speed and accuracy. The instructors will continue this process.

This course transitioned to the ICD10-CM code set during this academic year. The area most in need of improvement is CO3 dealing with the subcategory of poison coding. The instructor devoted more time and training in this area after the fall 2014 semester with significant improvement between the fall and spring semesters. The instructors will continue to use this process in the next academic year.
