HCC Dental Education Clinic Services & Fees

Dear Patients,

Welcome to the HCC Dental Education Clinic. Please take a few minutes to read this brochure, as the information provided within should answer many of your questions.

Please remember that HCC is a teaching institution. HCC's primary goal is to offer the best education to students while providing the highest quality care for patients. Due to paperwork and the process of evaluating student performance, your appointment will take approximately four hours. It may also be necessary for you to return for additional appointments in order to complete your treatment. The clinic serves adults and children, ages five and older. The HCC Dental Education Clinic provides preventative services only (e.g., cleanings, sealants, x-rays, and fluoride treatments). Restorative care (e.g., fillings, extractions, etc.) is not provided.

Students and staff appreciate your patience and cooperation. Any additional care you may require should be secured through a private dental office. All patients must maintain a regular schedule for checkups with their dentists. Please note that the HCC Dental Education Clinic does not replace a patient's dentist of record.

We sincerely hope that your experience in the HCC Dental Education Clinic will be beneficial. If we can assist you in any way, please let us know.

Sincerely,

Dental Education Faculty
