Course Outcomes INT-105 Plumbing and Pipefitting

**Course Title:** INT-105 Plumbing and Pipefitting

**Course Instructor(s):** Richard Calhoun

**Programs:** Industrial Technology, Alternative Energy Technology

**Expected Learning Outcomes**

1. Identify basic tools and materials of the plumbing trade.
2. Develop safe and effective application skills from cognitive learning.
3. Demonstrate effective fabrication of materials in the plumbing profession.
4. Demonstrate effective installation of common plumbing fixtures.
5. Describe the key plumbing trade terms and definitions.
6. Assess basic plumbing trouble shooting skills.

**Assessment**

Assessments will include:
- 2 written tests and a final written exam
- Classroom lab exercises and assignments

**Validation**

1. Comparison of final exam results with national average skills in the plumbing, energy, commercial and industrial field of work.

2. The evaluation of student performance and ability to transfer knowledge to next level of class in the program.

3. Consult Advisory Committee participants as to performance of interns and hired students based on ability and knowledge gained.

**Results**

The results of the testing and final examination will show the level of retention of the classroom materials.

Prepared by: Anthony Valente
Course Outcomes INT-105 Plumbing and Pipefitting
The results of the practice exercises and assignments will show the ability of the student to transfer textbook information to hands-on applications.

The results of the Advisory Committee input will allow us to place a rate of success in our database for ongoing improvement to the course and advise us of changes in technology and industry standards.

Internships will measure the student outcomes in a real world environment through feedback from internship supervisor.

*The average classroom grade for the fall 2015 semester was 56%. The overall percentage is considerably low due to three students not attending the class and did not withdrawal officially from the class and therefore was given a zero. The average grade for the remainder of the students was 90.5% which is acceptable giving the small number of students who attend it which allowed more one-on-one attention by the instructor.*

Follow-up
The data will be evaluated to improve teaching techniques
The data will be evaluated to help us remain up to date with technology changes.

*Students continue to be evaluated in courses that this course is a prerequisite for to determine whether or not the use of measurement tools is been accomplished at a satisfactory level.*

Budget Justification
Update textbook to include changes in technology
Update classroom equipment to keep pace with changes in technology

*No Budget or Textbook upgrades required at this time.*
