**Validation** (What methods have you used or will you use to validate your assessment?)

Rubrics have been created or will be created that will monitor student success with each assessment.

**Results** (What do your assessment data show? If you have not yet assessed student achievement of your learning outcomes, when is assessment planned?)

Students should average an 85 in the course, if they receive lower or higher on average, the assessments will need to be re-evaluated.

**Follow-up** (How have you used or how will you use the data to improve student learning?)

Curriculum will be adjusted based upon student outcome success. If the average of the class falls below the average or above, the rigor of the course will need to be examined. Eventually, external validation will be arranged.

Spring 2015

These two students were part of a class of ten and we mounted two very difficult and technical ballet works. They applied their best work and did an outstanding job. In the future, I will consider giving the class slightly less demanding work as students seemed a little stressed by the length and difficulty level of the choreography. Overall, I am very pleased with the process this semester.

Spring 2016

All students met the intended outcomes for the course this semester. Material was catered to the skill level of the dancers and dancers excelled in their respective roles. The biggest problem with the course is enrollment. Dance overall needs more enrollment and more advertising needs to be done to generate that enrollment.

**Budget Justification** (What resources are necessary to improve student learning?)

Small costume budget.
