Expected Learning Outcomes

Students will:
- analyze the effect of changing views of children and childhood on programs and services for children.
- explore effective teaching strategies that help children achieve important learning and developmental goals and motivate children to learn.
- apply the use effective assessment strategies used for gathering and recording evidence that supports children’s learning and development.
- analyze what it means to become a professional early childhood educator and the obligations and commitments to children that early childhood professionals must understand and embrace.

Assessment (How do or will students demonstrate achievement of each outcome?)

Professional Portfolio

Validation (What methods have you used or will you use to validate your assessment?)

Education professors and Washington County teachers (current and recently retired) have participated in the evaluation process of the EDU 103 portfolio. The results are then compared in order to validate our grading procedures and rubric.

Results (What do your assessment data show? If you have not yet assessed student achievement of your learning outcomes, when is assessment planned?)

I continually analyze data from the portfolio assignment in order reflect on the overall assignment, delivery, etc. and then make adjustments accordingly. I have made adjustments to the portfolio in order to support students with areas that seem to be challenging or in need clarity.

The goal for the portfolio is that 80% of students will earn an 80%, B or better. Lecture and online sections complete a peer review in which quality feedback is expected. I closely review this feedback and ask leading questions and/or post information that may pertain to weak skills that I observe as necessary for multiple students. This was well received and the benefits were evident.
Follow-up (How have you used or how will you use the data to improve student learning?)
In the spring semester I implemented a conference as a part of the required coursework. This was strategically placed in the schedule at a point where students would be building their portfolio. This provided an opportunity to review the expectations, a sample that pertains specifically to them, and answer any questions. The conference could be done via phone, but in person conferences were encouraged. Conferences also provide a time for me to check in on any advising needs and recommend learning strategies and/or the Learning Support Center. In addition to the conference, in the fall of 2017, I will implement smaller assignments of various components within the portfolio, in hopes of clarifying and strengthening the larger assignment.

Budget Justification (What resources are necessary to improve student learning?)
Current resources are suitable
