Hagerstown Community College Master Syllabus
IST 107: Database Fundamentals

Course Information
IST 107: Database Fundamentals
3 Credits
Fall 2018
August 27 through December 14, 2018
Monday from 10:00 to 11:15 a.m.

Instructor Information
Instructor: Douglas Courter

Course Description
This course is intended as a first course in database management, Microsoft Access is a relational
database management system which enables users to manipulate data without redundancy by defining
relationships between sets of data. The following database management skills are encountered through
the use of business applications: creating and modifying the structure of tables, creating and editing
data, sorting, indexing, and querying a database.

Textbook and Course Materials
Hall

Student Learning Outcomes
• Upon completion of this course, students will be able to:
• Demonstrate the value of using a Database Management System to store and retrieve
  information.
• Understand the basic design and implementation strategies for the development of online
databases.
• Develop a working knowledge of a particular Database Management System (in this case, Access
  2013).
• Develop sophisticated queries and reports based on the database.
• Learn how queries and reports can support the business decision-making processes.
• Use the database to integrate with other programs such as Word Processing and Spreadsheet.
**Definition of Credit Hour: Classroom Courses**

To earn one academic credit at HCC, students are required to complete a minimum of 37.5 clock hours (45 fifty-minute academic hours) of coursework per semester. Those hours of coursework may be completed through a combination of hours in the classroom and hours outside the classroom. Certain courses may require more than the 37.5 minimum hours of coursework per credit. For most classes, students should expect to complete at least 2 hours of coursework outside of class for each hour of in-class coursework.

**Minimum clock hours required for this course**
