Course Outcomes Guide
RAD 218 Spring 2018

Course/Program Title: RAD 218 Principles of CT Imaging  Date: Spring 2018
Course/Program Team: Richard Kaiser

Expected Learning Outcomes:
Student Learning Outcomes:
1. Define and apply the basic terminology in Computed Tomography.
2. Analyze and critique Computed Tomography images.
3. Apply the basic concepts in performing a computed tomography procedure.

Assessment (How do or will students demonstrate achievement of each outcome?)
- Unit Exams
- Designated questions from final exam (85% of students will answer correctly)
- Research paper

Validation:
- Completion of course with a 75% or higher.
- 85% of students will answer designated questions correctly.

Results: All completed the course with a 75% or higher.
Class composition: 10 total students- 3 professional students; 7 Radiography program students

</table>

Follow-up: 2018 average score on final: 81%
- Continue to focus on main points from each chapter of text
- Provide students supplemental materials to enhance learning
- Arrange a ‘field trip’ to see a CT scanner and its functions in real-life practice.

Budget Justification: No new budget items needed.
