Follow up – Section 01 Lecture Based

With the new edition of the textbook, the course was revised by the Program Coordinator. The chapters were covered in their entirety rather than splint in half. Tests were 2 chapters at a time, with one 3 chapter test. The comprehensive final exam remained. The number of questions for each test was reduced as well. In class worksheets were also revised with more work being done in class when the instructor was present to provide assistance. The results were very favorable this semester. Continued evaluation with multiple sections is needed for the fall semester for verification of improvement.
