Course Outcomes Guide

Course/Program Title:  MAP 211 Advanced Coding

Date:  SP 19

Course/Program Team:  Melinda McIntire, Michele Buzard

Expected Learning Outcomes:

1. Utilize current ICD, CPT and HCPCS code books to accurately convert medical specialty and hospital medical record source document information into codes for purposes of billing and reimbursement.
2. Apply concepts of medical necessity, correct coding initiative guidelines, local coverage determinations and documentation requirements to develop accurate and appropriate coding in both hospital and non-hospital settings.
3. Apply knowledge of CMS reimbursement methodologies and documentation regulations to develop accurate and appropriate coding for various clinical situations.

Assessment

Course completion:  Number passing at 75% or greater.

Course Outcomes:  Common final exam for item analysis:

CO 1  Complex wound repair
CO 1  History of Breast Cancer
CO 1  CPT code breast mass
CO 2  Type of Fracture
CO 2  Fracture unsuccessful reduction
CO 2  Ambulance Services
CO 3  Bronchoscopy w/Fluoroscopy
CO 3  Modifier multiple hospital OP depts. One day
CO 3  Fracture manipulation

Validation

Course Completion:

Completion of course with an average grade of 75% or greater.

Course Outcomes:

CO 2  Apply concepts of medical necessity, correct coding initiative guidelines, local coverage determinations and documentation requirements to develop accurate and appropriate coding in both hospital and non-hospital settings.
Course outcome target final exam questions will be answered correctly by 75% of the students.

Results

Course Completion:

100% (9/9 students) completed course with a grade of 75% or higher. A-3 B-4, C-2

Course Outcomes:

CO 1  Complex wound repair  
CO 1  History of Breast Cancer  
CO 1  CPT code breast mass  
CO 2  Type of Fracture  
CO 2  Fracture unsuccessful reduction  
CO 2  Ambulance Services  
CO 3  Bronchoscopy w/Fluoroscopy  
CO 3  Modifier multiple hospital OP depts. One day  
CO 3  Fracture manipulation

CO 2. Apply concepts of medical necessity, correct coding initiative guidelines, local coverage determinations and documentation requirements to develop accurate and appropriate coding in both hospital and non-hospital settings. 100%

Follow-up
Based on the above % for CO 2, the course objectives are meeting expectations. The instructor will continue to assist students in the accurate coding and reimbursement procedures with current information and study guides.

Number of students assessed: 9

Budget Justification: None
