Course Information
EGT 235: Fluid Power and Laboratory
3 Credits
Spring 2019
January 7, 2019 through April 29, 2019
Class on Mondays from 5:30 P.M. to 7:30 P.M.
Laboratory on Wednesdays from 5:30 P.M. to 7:30 P.M.

Instructor Information

Course Description
This course focuses on the industrial use of fluid power. The fundamental properties of fluid statics and dynamics are applied to the design of pumps, valves, motors, actuators, accumulators, fluid circuits, and control systems. Laboratory fee required. *Pre-requisite: PHY 201

Textbook and Course Materials

TEXTBOOK (SUGGESTED):

Student Learning Outcomes
Upon completion of this class the student will be able to:
- Apply mathematical concepts
- Demonstrate the ability to think critically.
- Transfer theoretical knowledge into practical applications.
- Use effective communication skills.

Definition of Credit Hour: Classroom Courses
To earn one academic credit at HCC, students are required to complete a minimum of 37.5 clock hours (45 fifty-minute “academic” hours) of coursework per semester. Those hours of coursework may be completed through a combination of hours within the classroom and hours outside the classroom. Certain courses may require more than the 37.5 minimum hours of coursework per credit. For most classes, students should expect to do at least 2 hours of coursework outside of class for each hour of in-class coursework.
Minimum clock hours required for this course
