

Course Outcomes Guide

Course/Program Title: Supplemental Clinical Education **Date: Spring 2019**
Instructor: Megan Dayhoff

Expected Learning Outcomes:

The student will:

1. Demonstrate competency (85% or higher) in the performance areas and procedures specified in the educational plan.
2. Perform patient care, radiation safety and protection, equipment operation, standard precautions and communication appropriate (75% or higher) to the student's level of clinical experience.
3. Complete all goals of the educational plan at a performance level (75% or higher) acceptable for the student's level of clinical experience.

Assessment: (How do or will students demonstrate achievement of each outcome? Please attach a copy of your assessment electronically.)

- Clinical Assessments/Evaluations completed by department staff

Validation:

- Completion of course with an average grade of 75% or higher.
- Satisfactory completion (75% or higher) of all Competencies and course work.
- Student's completion of a detailed case journal, which will include specific information about each procedure the student observed/assisted with during rotation.

Results: (What do your assessment data show? If you have not yet assessed student achievement of your learning outcomes, when is assessment planned?)

- 100% (1/1 students) completed the course with a 75% or higher
- 100% (1/1 students) satisfactorily completed (75% or higher) all evaluations and course work.

Follow-up: (How have you used or how will you use the data to improve student learning?)

Continue mandating students to complete the IR (RAD 190) clinical objectives and maintain the clinical case journal to ensure students are fully immersed in the clinical learning environment.

Budget Justification: (What resources are necessary to improve student learning?)

No resources needed at this time.
