

<p style="text-align: center;">Course Outcomes Guide RAD 220 Summer 2019</p>
--

Course/Program Title: RAD 220 Principles of CT Imaging Practicum I

Course/Program Team: Megan Dayhoff

Expected Learning Outcomes:

Student Learning Outcomes:

1. Correctly prepares and conducts a CT examination in the clinical setting.
2. Demonstrates the appropriate image contrast and window levels to accurately represent the pathology being investigated.
3. Identifies basic anatomy, physiology and pathology of the body areas.
4. Demonstrates the appropriate scanning sequences and contrast administration.

Assessment: (How do or will students demonstrate achievement of each outcome? Please attach a copy of your assessment electronically.)

- Mid and end of semester evaluations.
- ARRT required repetitions.

Validation: (What methods have you used or will you use to validate your assessment?)

- Completion of course with a 75% or higher.
- Obtain a minimum of 85% or higher on the mid and end of semester evaluation.
- Students will complete at least 32 of the required ARRT repetitions.

Results: (What do your assessment data show? If you have not yet assessed student achievement of your learning outcomes, when is assessment planned?)

- **Only one student enrolled in RAD 220 in the summer 2019 term. Student withdrew from the course at week 4.**
- 0% (0/1 students) completed the course with a 75% or higher.
- 0 % (0/1students) obtained an 85% or higher on the mid and end of semester evaluation.
- 0% (0/1 students) of students completed all of their required ARRT repetitions.

Follow-up: (How have you used or how will you use the data to improve student learning?)

- Continue to monitor student in clinical to ensure that students are completing all of their required ARRT repetitions so that they will be able to take their national exam.
- Continue to use CT Basics modules as supplemental teaching material.

Budget Justification: (What resources are necessary to improve student learning?)

No new budget items needed.
