

Medical Lab Technicians are well paid and in demand

New degree program coming to HCC fall 2022!

- If you're interested in the medical field, but prefer to have limited patient contact, this could be the career for you.
- Medical Lab Techs (MLTs) conduct tests in the laboratory to determine clinical test results that aid in patient diagnoses. They typically work in diagnostic labs, doctor's offices, hospitals, industry, and biotechnology.
- The median salary for MLTs is \$54,180, and the job market is expected to see strong growth as the population ages. (source: www.bls.gov/ooh)
- The A.A.S. degree can be completed in two years. Upon completion, you'll be eligible to take the exam to be certified by the American Society of Clinical Pathology.
