

Small Organisms

Today, we will be looking at very small or microscopic organisms with a magnifier and a microscope.

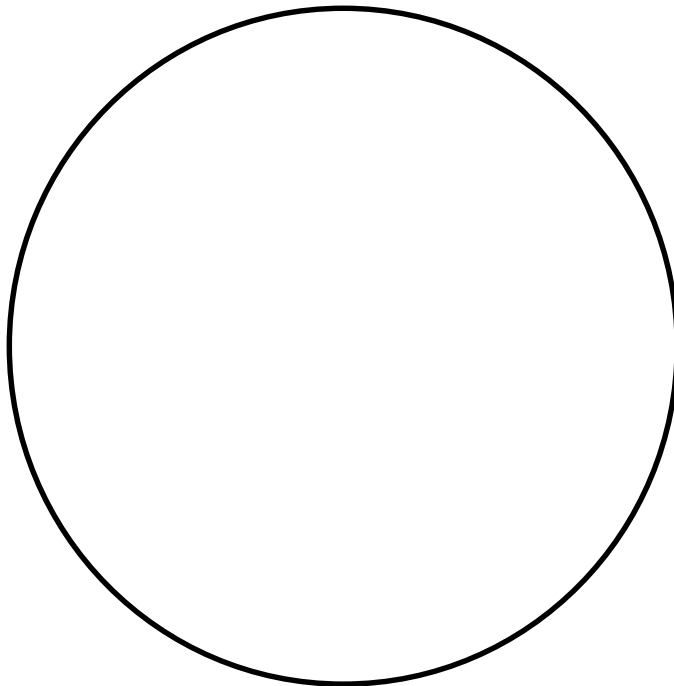

Hand lens

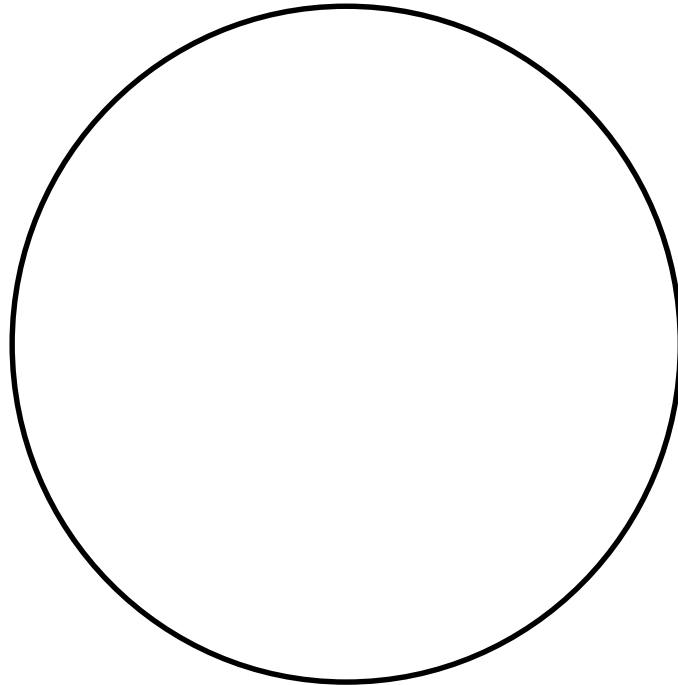

Dissecting Microscope

You will be given a slide with some microorganisms on it. First look at it with your **hand lens**.

1. **Draw** what you see and **label** your drawing:

2. Now look at it with a microscope and draw what you see. Label what you can.

3. What is your organism? **Circle one:** Plant Animal Something else

4. Why do you think so?

5. Now, we're going to look at what everyone else in the class saw with their microscopes. Draw your favorite below:
