

Course Name: Cybersecurity Baseline Initiative

Course Number: CMT-001-F

Course Outline: See below

- I. Network Theory**
- II. Bounded Network Media**
- III. Unbounded Network Media**
- IV. Network Implementations**
- V. TCP/IP Addressing and Data Delivery**
- VI. Routing**
- VII. TCP/IP Services**
- VIII. WAN Infrastructure**
- IX. Cloud and Virtualization Technologies**
- X. Network Security Basics**
- XI. Preventing Security Breaches**
- XII. Responding to Security Incidents**
- XIII. Remote Networking**
- XIV. Network Management**
- XV. Troubleshooting Network Issues**
- XVI. Security Fundamentals**
- XVII. II: Identifying Security Threats and Vulnerabilities.**
- XVIII. Managing Data, Application, and Host Security**
- XIX. Implementing Network Security**
- XX. Implementing Wireless Security**
- XXI. Managing Certificates**

- XXII. Implementing Compliance and Operational Security**
- XXIII. Risk Management**
- XXIV. Troubleshooting and Managing Security Incidents**
- XXV. Business Continuity and Disaster Recovery Planning**
- XXVI. Assessing Information Security Risk**
- XXVII. Analyzing the Threat Landscape**
- XXVIII. Analyzing Reconnaissance Threats to Computing and Network Environments**
- XXIX. Analyzing Attacks on Computing and Network Environments**
- XXX. Analyzing Post-Attack Techniques**
- XXXI. Managing Vulnerabilities in the Organization**
- XXXII. Implementing Penetration Testing to Evaluate Security**
- XXXIII. Collecting Cybersecurity Intelligence**
- XXXIV. Analyzing Log Data**
- XXXV. Performing Active Asset and Network Analysis**
- XXXVI. Responding to Cybersecurity Incidents**
- XXXVII. Investigating Cybersecurity Incidents**
- XXXVIII. Addressing Security Architecture Issues**
