Presentation: Four Paths to Meet the Technology Skills Future – What you do today will make or break your company tomorrow

Is your organization prepared for the almost here technology skills gap? If the statistics are accurate, there will be 18 million unfilled technical jobs in the US alone by 2030; at all levels and in all sectors. The old ways of hiring skilled, experienced performers will give way to the future ways of hiring for ability and training to competence. This begins with strong technical college, community and business partnerships. During this highly interactive presentation participants will learn the critical research and trending best practices to meet the future technology skills gap through four cutting-edge strategies. Afterwards, participants can leverage three takeaways to prepare for the future.
